New Company Formed to “Facilitate Composite Technology”

Salt Lake City, UT, USA and Brussels, Belgium (Feb. 16, 2010) — Seifert and Skinner & Associates, Inc. (SS&A) is a new company formed to “Facilitate Composites Technology”. Bringing a wealth of experience to the company, the founders, Axel Seifert and Michael Skinner, together have more than 50 years experience in filament winding, software for composites, composite processes, composite product design and development, training and consulting. Both are known worldwide for their expertise in filament winding with numerous projects, papers, articles and seminar presentations.

Mr. Seifert stated “During my entire career, I have been enthusiastically dedicated to filament winding technology. In our new business I want to continue that tradition and expand our focus to become the foremost facilitators of composites technology.” Mr. Skinner explained “The company will provide a range of products and services, focusing initially on filament winding and its applications, product design and development and training. We want to broaden our offerings over time to have the services and products we need to give our customers easy access to composites technology.”

Seifert and Skinner & Associates will have offices in both Salt Lake City, Utah in the United States and in Brussels, Belgium.

Mr. Seifert has resigned his position as managing director at Material SA. Mr. Skinner’s composite consulting activities will now be available exclusively through SS&A.
