New Associate Joins Seifert and Skinner & Associates, Inc.

Brussels, Belgium (Mar. 10, 2010) — Seifert and Skinner & Associates, Inc. (SS&A) announces the addition of Kristof Weckx to their roster of associates. Mr. Weckx studied Mechanics at the Technisch Instituut Heilig Hart in Belgium, specializing in composites and plastics processing. He has worked as a product development engineer for several companies in the composites industry and has built up broad experience in processing of thermoplastic composites.

Mr. Weckx will be manager of the new SS&A composites laboratory, near Brussels, Belgium, focusing on client projects. Mr. Weckx stated, "I believe that the composite industry is full of innovation and opportunity. I want to continue working with composites and, hopefully, develop some new and interesting products and applications for our clients. Our composites laboratory will facilitate the development of these new ideas."

Mr. Axel Seifert, Managing Associate of SS&A, said, "I have worked with Kristof for a number of years and am delighted to welcome him to our new organization. His expertise, especially with thermoplastic composites, is a welcome addition."

Mr. Weckx speaks fluent Flemish, French and English. He has travelled around the world acting as a speaker and trainer helping clients to achieve improvements in their composite technology.
